

MODULE 5: Hypermodality

Hypermodality:
intermodal + multimodal
+ digital

CORE QUESTION: What form can personal logistics solutions take?

• TOPICS: Ecosystem of fully integrable and sustainable mobility, logistics and ancillary services that allows end users to assemble their own door-to-door mobility and logistics chains based on their special needs

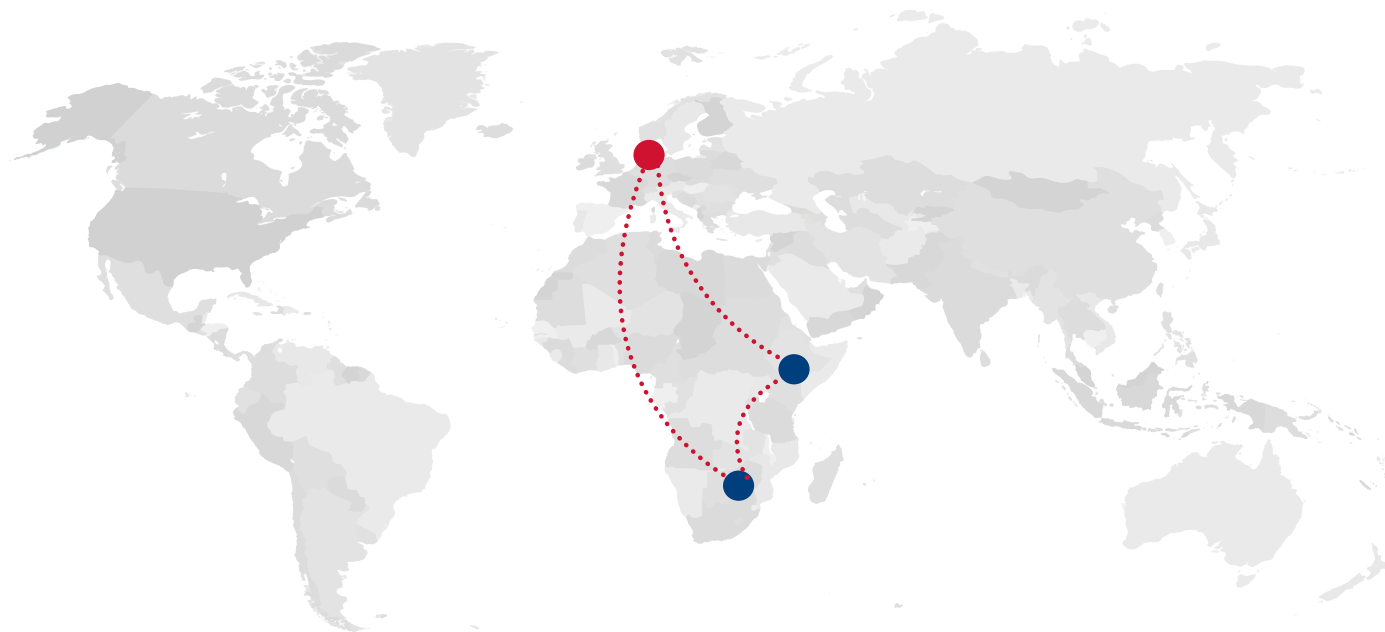

• TARGET GROUP: Integrated solutions, synchronised processes, supply chain security, real-time information, individual mobility planning and sustainable systems

“We believe in hypermodality”

Digitalisation will change logistics and supply chain management.
Be prepared: Join our international Scalex network!

Scalex Locations

Nairobi, Kenya 12-14 September 2019
Johannesburg, South Africa 18-21 September 2019
Frankfurt, Germany (Hypermotion) 26-28 November 2019

Scalex Board

Dr. Jörg Mosolf
Chairman of the Presiding Committee, DVF
Chairman of the Executive Board (CEO), MOSOLF SE & Co. KG

Dr.-Ing. Felix Kasiske
HPC Hamburg Port Consulting GmbH
Managing Director & Partner
Market Sector Director,
Intermodal Rail Terminals

Peter Kunz
Colliers International
Head of Industrial & Logistics / EMEA

Prof. Dr.-Ing. Michael Benz
Benz + Walter GmbH
Managing Partner & Department Head at ISM in Frankfurt am Main

Michael Mohr
SSI Schäfer
Executive Vice President Sales / Member of the Corporate Board

The high-calibre board provides ideas for the content, partners and structure of Scalex. It identifies topics and development opportunities in Scalex regions. The board also discusses potential that exists for the logistics industry and implements this within the framework of the Scalex platform.

Leading platform for digital integrated solutions in supply chains and logistics

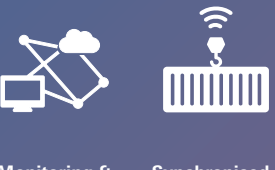

MODULE 1: Transportation & Infrastructure

CORE QUESTION: What are the best components for your logistics solutions?

- TOPICS:** Providing the basic requirements for goods transportation (infrastructure, equipment and services)
- TARGET GROUP:** Logistics infrastructure, enterprises and services, equipment, transport, warehousing and handling

MODULE 2: Supply Chain Management (Operative Systems)

CORE QUESTION: What should a customer-centric supply chain look like?

- TOPICS:** Enterprise resource planning (ERP) in transportation, aligned cross-company processes and synchronised logistics through applications. Usage of track & tracing and monitoring applications
- TARGET GROUP:** Logistics centres, smart facilities, real estate, IT systems, sensors and detectors, applications, tracking and tracing, maintenance, repair & overhaul

MODULE 3: Supply Chain Analytics (Analytical Systems)

CORE QUESTION: How can inventory be replaced by information?

- TOPICS:** Usage of big data analytics and data science, root-cause analysis, forecasting, early warnings and supply chain event management. Data integration and decision support
- TARGET GROUP:** Broadband and mobile networks, data analytics and science, telematics, predictive maintenance, forecasting, supply chain event management, apps, car-to-X and autonomous driving

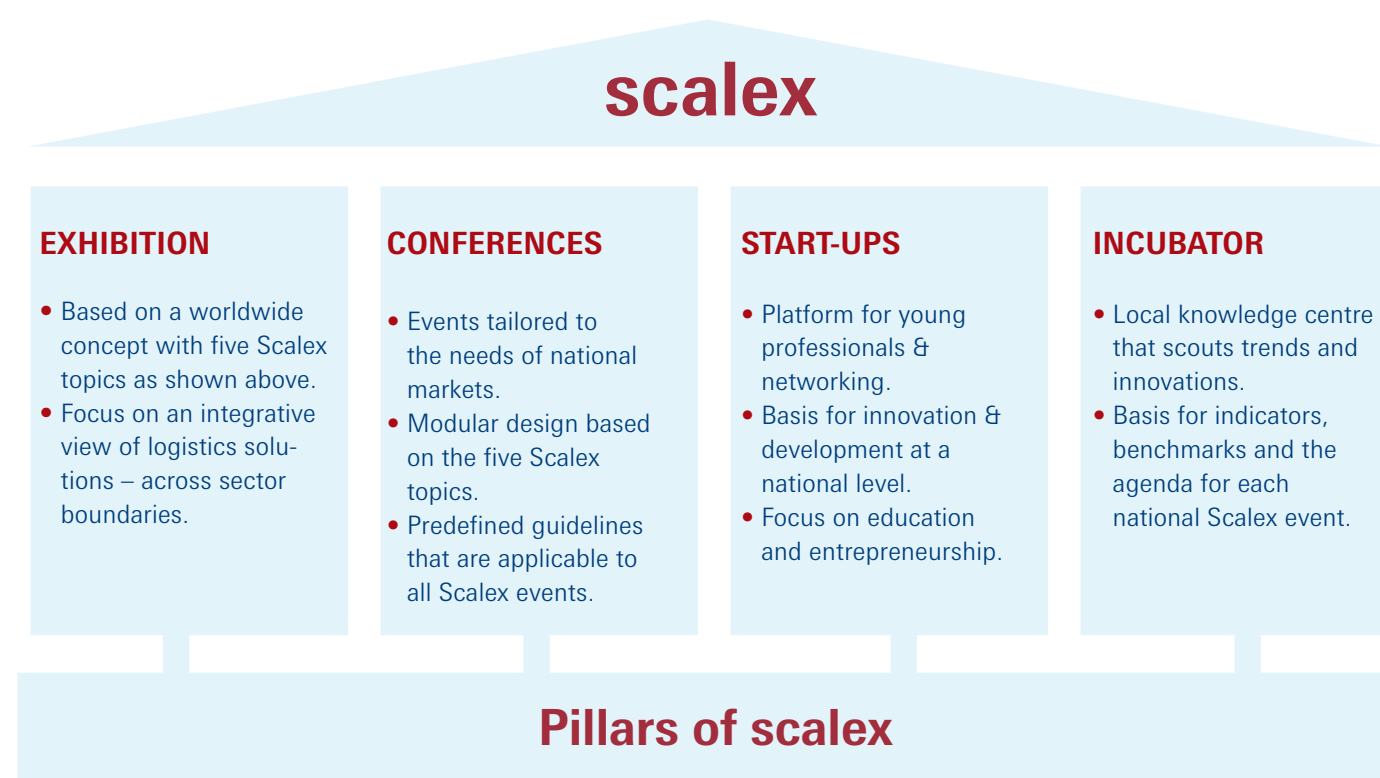

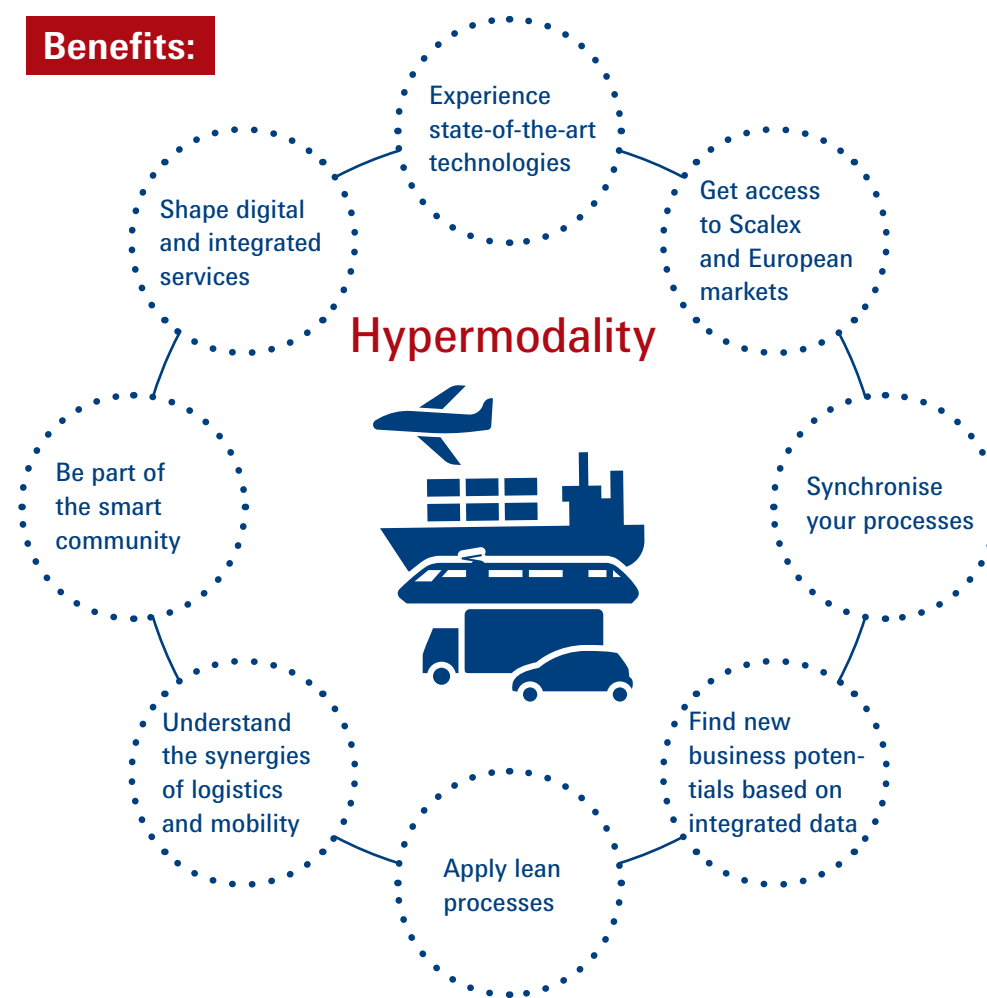

MODULE 4: Integrative Chains

CORE QUESTION: What might smart and sustainable solutions look like for you?

- TOPICS:** Link between operative systems and data analytics. Alignment of logistics and mobility processes with needs of cities and their inhabitants (mobility habits, ecology etc.). Running of smart cities/regions
- TARGET GROUP:** Smart cities, sustainability, zero-emission vehicles, traffic management, dynamic telematics and intelligent infrastructure

Benefits:

Digitalisation – a key success factor

Logistics and transport are both the foundation of global supply chain networks and the key to their success.

Digital innovation is driving change in transport, logistics and their related business processes. As a result, digitisation has become a key success factor for integrated logistics and transport networks. In the long run, digitisation will lead to value chains that are aligned and synchronised with one other.

Scalex is a dynamic network of exhibitions and conferences that serves as a platform for the industry in logistics and transport focal points.

Scalex aims to discuss new integrated logistics solutions and pave the way for their implementation. Depending on a country's scope of services, various modules can be offered within the framework of Scalex, all of which build on each other and reflect the country's logistics maturity.

The modular portfolio of Scalex

Scalex was inspired by HYPERMOTION, which was successfully launched in Frankfurt am Main in 2017 as an innovative mix of events for the mobility and logistics industry combining a trade conference, exhibition and future lab.

Working towards digital integrated solutions

That is why the goal of international Scalex events is to showcase and debate digital and integrated logistics solutions from all over the world.
